

Highlights

- Provides a highly secure architecture and stable platform for deploying business processing applications
 - Facilitates consolidation of UNIX, IBM i and Linux workloads for midsize businesses
 - Helps you gain faster insights with the IBM POWER8 processor
 - Includes smart acceleration enabled by Coherent Accelerator Processor Interface (CAPI) technologies
 - Helps reduce energy consumption using advanced energy control
-

IBM Power System S814 server

Open technology server for midsize business solutions

Power Systems: Innovation to put data to work

New innovation brings faster insight to the point of impact for today's data hungry applications

Built with innovation that puts data to work, IBM® Power Systems™ deliver the foundation for organizations to bring insight to the point of impact up to 2x faster. These first generation systems push the physical and virtual boundaries of data center technology with innovation designed to drive faster and more efficient data-centric applications required for today's smarter enterprise.

With new innovations, Power Systems can help you:

- Gain faster insights with the IBM POWER8™ processor and smart acceleration enabled by Coherent Accelerator Processor Interface (CAPI) technologies such as accelerators for key workloads
- Achieve lower latency and smaller footprint with CAPI Flash
- Move data in and out of systems more quickly with twice the memory and I/O expansion
- Achieve greater speed and efficiency for database, transactional and other highly multi-threaded applications with transactional memory supported by 50 percent more cores and 2x the number of simultaneous threads per core

Designed and optimized for big data and analytics

Businesses are amassing a wealth of data. Power Systems, built with innovation that puts data to work, can scale to support growing workloads and help businesses find insights faster. Power Systems are designed for

big data. From operational business intelligence and data warehouses to predictive analytics solutions, IBM Power® servers are optimized for the compute-intensive performance demands of database and analytics applications. These servers can flexibly scale to support the demands of rapidly growing data for mid-market businesses.

Delivering open innovation by revolutionizing the way IT is developed and delivered

With an architecture at the heart of the open server development community and the OpenPOWER Foundation, the open technology platform at the core of Power Systems presents a world of community created innovation, applications and technology components to help quickly deliver a broader set of applications and new technologies. Leveraging open standards, Power Systems provide developers with tools tuned for a platform that can boost productivity and performance by removing constraints imposed by commodity architecture. With continuous innovation built into the platform, Power Systems can enable future integrated hardware solutions designed to dramatically accelerate compute and data-intensive tasks.

IBM Power System S814 server

The IBM Power System S814 is designed to be a highly secure architecture providing a stable database and middleware platform for efficient deployment of business processing applications. A 1-socket system with a 6-core POWER8 processor is available in either a rack or tower configuration. The higher performance 8-core system is available in a rack configuration and supports new I/O capabilities including CAPI accelerators, higher internal disk and solid state disk (SSD) capacities, and hot plug PCIe Gen3 slots.

IBM Systems

Data Sheet

| IBM Power System S814 server at a glance | |
|--|--|
| System configurations | Model 8286-41A |
| Processor and Memory | |
| Microprocessors | One 4-core 3.02 GHz POWER8 processor card (rack and tower) or One 6-core 3.02 GHz POWER8 processor card (rack and tower) or One 8-core 3.72 GHz POWER8 processor card (rack only) |
| Level 2 (L2) cache | 512 KB L2 cache per core |
| Level 3 (L3) cache | 8 MB L3 cache per core |
| Level 4 (L4) cache | 16 MB per DIMM |
| Memory Min/Max | One, two or four 16 GB 1600 MHz DDR3 module (4- core configuration only) 16 GB, 32 GB, 64 GB and 128 GB 1600 MHz DDR3 module, 16/1024 GB (for 6-core or 8-core configuration) Active Memory Sharing |
| Processor-to-memory bandwidth | 192 GBps per socket |
| Storage and I/O | |
| Standard backplane | Eight (4-core) or twelve (6- or 8-core) small form factor (SFF) bays for Hard Disk Drive (HDD)/Solid State Disk (SSD) |
| With dual IOA higher function backplane | 18 SFF bays for HDD/SSD (6- or 8-core only) |
| Media bays | One slimline DVD |
| Integrated SAS controller | Standard RAID 0,5,6,10. optional: 7200 MB [†] cache & Easy Tier function |
| Adapter slots | Included one x8 PCIe slots must contain a 4-port 1 Gb Ethernet LAN available for client use Seven PCIe Gen3 slots with concurrent maintenance: two x16 plus five PCIe Gen3 x 8 One CAPI adapter |
| I/O bandwidth | 96 GBps per socket |
| Expansion features (Optional) | |
| Max PCIe Gen3 I/O drawer | 1 |
| Power, RAS, System Software, Physical Characteristics and Warranty | |
| Power supply | Tower: 100 V to 240 V; Rack: 100 V to 240 V |
| RAS features | Processor instruction retry Alternate processor recovery Selective dynamic firmware updates Chipkill memory ECC L2 cache, L3 cache Service processor with fault monitoring Hot-swappable disk bays Hot-plug concurrent maintenance PCIe slots Hot-plug and redundant power supplies and cooling fans Dynamic processor deallocation Extended error handling on PCI slots |
| Operating systems* | AIX, IBM i and Linux on POWER |
| System dimensions | Rack: 427.5 W x 173 H x 750.5 D mm Tower: 328.5 W x 522 H x 751.7 D mm |
| Warranty | 3 year Limited Warranty, on site for selected components; CRU (customer replaceable unit) for all other units (varies by country), Next business day 9x5 (excluding holidays), warranty service upgrades and maintenance are available. |

For more information

To learn more about the IBM Power System S814 server, please contact your IBM marketing representative or IBM Business Partner, or visit the following website:

Additionally, IBM Global Financing can help you acquire the IT solutions that your business needs in the most cost-effective and strategic way possible. We'll partner with credit-qualified clients to customize an IT financing solution to suit your business goals, enable effective cash management, and improve your total cost of ownership. IBM Global Financing is your smartest choice to fund critical IT investments and propel your business forward. For more information, visit: ibm.com/financing
